Magnets are a natural treatment for pains and inflammations [click here](#) →

NATURAL REMEDIES

It is common knowledge that magnetotherapy has always helped the body to naturally recover total functionality. **MAGNETS** give a considerably rapid relief to people affected by limitation of movements, muscular or joint pain, backache, cervical pain, lower back pain, sciatica, arthritis, tendinitis, sprains, distortions or various types of pains. Magnets can be used at any age and are **not contraindication** (except for pregnant women and patients wearing pacemakers). In case of acute pathologies, magnets reduce painful symptoms and recovery time.. In a case of joints pathologies magnets have immediate effect on discomfort.

The use of magnets is **absolutely compatible** with pharmacological and natural therapies.

∅ 25 mm / ∅ 20 mm

LARGE NORTH POLE® MAGNETS

Large magnets are easier to be placed on the exact spot that need to be treated. The 60x30mm and 60x5mm magnets are enclosed in a protective sealed "shell" and the 60x5 mm magnet, "naked" is enclosed in a **special curved magnetic device**.

Weight and dimension of large magnets make them easier to be applied during rest time, and also with the aid of bandages, tape or any devices that are we currently designing to facilitate their application.

MA.1 MAGNET

The powerful **MA.1** magnet is designed to provide the beneficial effects of magneto-therapy even to body parts that are difficult **to be treated, such as fingers, toe** (ie: proximal intermediate and distal phalanges).
